

## ENVIRONMENTAL POLICY

JPG believes in the goal of sustainable development as the cornerstone of JPG business policy. As good corporate citizens, JPG is responsible to protecting the environment during the course of its business operations.

JPG is committed to the creation through the team effort of a quality environment as a key factor in the continuous success of its oil palm and bio-compost production business. To work towards developing a balance between environmental conservation and business objectives, JPG shall:

- Adhere to and comply with all relevant environmental legislations of the country in which JPG operate.
- Strive for continual improvement in environmental performance.
- Review, adopt and implement good management practices currently established in the industry.
- Plan, assess and take judicious actions to alleviate any potential negative impacts on the environment and local community with respect to any new development.
- Adopt and practice the zero burning techniques in land preparation for new planting and replanting programme as per Guidelines for the Implementation of the ASEAN Policy on Zero Burning. No open burning is allowed as per applicable environmental legislation.
- Adopt and practice Guided Self-Regulation (GSR) through the implementation of Environmental Mainstreaming (EM) Tools in our operation.
- Adopt and implement the principles of reduction, reuse and recycle in all matters pertaining to the use of resources and pollution elimination.
- Undertake to communicate Environmental Policy to all stakeholders and educate employees to practice and uphold business commitment to caring for the environment.
- Continue to enhance the knowledge and skill of employees by briefing, training and exposure to relevant new technology concerning any new improvement or development of the industry (effluent treatment and or plant improvement).
- Continue to explore and implement cost-effective technology in environmental management practices.
- Monitor and report to the JPG Board of Directors on the implementation of this Environmental Policy, and the achievement of environmental objectives and targets.
